OBJECTIVE

Obtain a position that will allow me to explore my creative skills through the design of products that users will love.

EDUCATION

Bachelor of Science in Computer Science, Cum Laude – Concentration in Digital Arts and Science   May 2015
University of Florida, College of Engineering *3.61 GPA*

SKILLS

Angular, Javascript ES6, Express, HTML, CSS, SASS, Nunjucks, Balsamiq, SQL, Git, Adobe Suite

EXPERIENCE

Front End Software Engineer   August 2015 to Present
FlexShopper LLC, Boca Raton, Florida

- Served on the core team that built the foundations of the entirely in-house built admin website for our marketplace: modular and permissions based using Angular, Webpack, Material Design, with the capacity to scale with our quickly growing company.
- Product Owner of the marketing tools section of the admin website. In charge of the planning, documentation, development, execution, and deployment of the product while leading a team of three.
- Assisted in developing and maintaining standards for Angular projects.
- Developed the My Account section of the FlexWallet mobile app, which currently sees 6,000+ daily users.
- Lead recruiter at multiple events at the University of Florida and Florida Atlantic University and mentor for onboarding new employees.
- Co-founded the Women in Technology interest group within the company.

Web Developer   January 2015 to May 2015
Trimark Properties, Gainesville, Florida

- Overhauled the dorms website into a responsive design targeting mobile phones.
- Collaborated with marketing team to incorporate the argument into the website design.
- Completed A/B testing to analyze which parts of the design were successful.

User Experience Intern   September 2014 to December 2014
Immersed Games, Gainesville, Florida

- Created wireframes and mockups of in-game features with the Prototype on Paper (POP) app.
- Built prototypes and tested them on targeted user groups.
- Iterated in an Agile development paradigm.

User Experience Intern   May 2014 to August 2014
The Home Depot, Atlanta, Georgia

- Created screen mockups using Balsamiq to communicate features to the business.
- Developed an internal web application using Angular.js, jQuery, and Bootstrap in an Agile environment.
- Saved 12 hours per week by aggregating data from many databases into one convenient location.

Data Integration Intern   May 2013 to August 2013
The Home Depot, Atlanta, Georgia

- Implemented new data integration software (Talend) and wrote documentation for company-wide usage
- Developed a job to automate the manual data integration process from a Microsoft SQL Server to the Salesforce.com cloud
- Salvaged at least 14 hours per week worth of labor by automating this process
